

UČNI NAČRT PREDMETA/COURSE SYLLABUS	
Predmet Course title	Metodologija okoljskih raziskav Environmental Research Methodology

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Upravljanje z okoljem/ 2. stopnja Environmental Management/ 2 nd Cycle	Ni smeri študija No study field	1. letnik 1 st year	2. 2 nd

Vrsta predmeta/Course type	obvezni/obligatory
----------------------------	--------------------

Univerzitetna koda predmeta/University course code	2_UO_1_UN5
--	------------

Predavanja Lectures	Seminar Seminar	Sem. vaje Tutorial	Lab. vaje Laboratory work	Teren. vaje Field work	Samost. delo Individ. work	ECTS
45		30			125	8

Nosilec predmeta/Lecturer:	doc. dr. Ivan Verdenik (Učni načrt pripravila doc. dr. Jelena Klisara)
----------------------------	---

Jeziki/ Languages:	Predavanja/Lectures: slovenski/Slovenian
	Vaje/Tutorial: slovenski/Slovenian

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:
<ul style="list-style-type: none"> • Vpis v prvi letnik študijskega programa. • Študent mora pred pristopom k izpitu pripraviti in predstaviti raziskovalno nalogu in biti ustrezeno prisoten na predavanjih in seminarjih vajah. 	<ul style="list-style-type: none"> • A prerequisite for inclusion is enrolment in the first year of study. • Students must prepare and present a research paper before the examination and be sufficiently present in the lectures and tutorials.

Vsebina:	Content (Syllabus outline):
<ul style="list-style-type: none"> • Osnovne definicije znanstveno-raziskovalnega dela. • Primerjava raziskovalnih strategij. • Etika in plagiarizem. • Opredelitev raziskovalnih vprašanj in hipotez. • Zanesljivost in veljavnost merjenja. • Načrt in oblikovanje raziskave. 	<ul style="list-style-type: none"> • The main definitions of scientific research work. • Comparison of research strategies. • Ethics and plagiarism. • Formulation of research questions and hypotheses. • Reliability and validity of measurements.

<ul style="list-style-type: none"> • <i>Okoljsko vzorčenje in zbiranja podatkov.</i> • <i>Modeliranje podatkov:</i> Statistični modeli; Diskrete statistične porazdelitve; Zvezne statistične porazdelitve; Linearni regresijski model; Analiza variance; Splošni linearni modeli. • <i>Inferenčna statistika:</i> Ocena parametrov; Testiranje statističnih domnev; Napake tipa I in tipa II, Statistično preverjanje značilnosti. • <i>Analiza časovnih vrst:</i> Komponente časovnih vrst; Preizkusi naključnosti; Odkrivanje sprememb in trendov; Napovedovanje. • <i>Ustvarjanje in pisanje raziskovalnega prispevka:</i> Naslovna stran; Povzetek; Uvod; Metodologija; Rezultati; Diskusija; Reference; Priloge. 	<ul style="list-style-type: none"> • <i>Proposal development and research design.</i> • <i>Environmental sampling and data collection.</i> • <i>Data modelling:</i> Statistical models; Discrete statistical distributions; Continuous statistical distributions; Linear regression model; Analysis of variance; Generalized linear models. • <i>Inferential statistics:</i> The estimation of parameters; Testing of statistical hypotheses; Type I and type II errors, Statistical significance testing. • <i>Time series analysis:</i> Components of time series; Tests of randomness; Detection of change points and trends; Forecasting. • <i>Research paper generation and writing:</i> Title page; Abstract; Introduction; Methodology; Results; Discussion; References; Appendices.

- Izbrani članki iz domačih in tujih znanstvenih revij s področja upravljanja z okoljem.

Cilji in kompetence: <i>Učna enota prispeva predvsem k razvoju naslednjih splošnih in specifičnih kompetenc:</i>	Objectives and competences: <i>The learning unit mainly contributes to the development of the following general and specific competences:</i>
<ul style="list-style-type: none"> • celovito kritično mišljenje, sposobnost analize, sinteze in predvidevanja rešitev s področja okoljskih raziskav, • sposobnost za reševanje okoljskih problemov z uporabo znanstvenih metod in postopkov, • sposobnost uporabe inferenčne statistike s ciljem sklepanja iz vzorca na populacijo, • razumevanje časovnih vrst, sposobnost odkrivanja sprememb in trendov ter sposobnost napovedovanja, • poznavanje standardov in meril za pisanje strokovnih in znanstvenih člankov, prispevkov, raziskovalnih poročil idr., • usposobljenost za predstavljanje pridobljenega znanja in raziskovalnih ugotovitvah. 	<ul style="list-style-type: none"> • comprehensive critical thinking, the competence to analyse, synthesize and anticipate solutions in the field of environmental research, • the ability to solve environmental problems using scientific methods and procedures, • the ability to apply inferential statistics with the aim of inferring from a sample to the population, • the understanding of time series, the ability to identify changes and trends, and the ability to make predictions, • knowledge of standards and criteria for writing professional and scientific research papers, articles, research reports etc., • qualifications to represent the acquired knowledge and research results.
Predvideni študijski rezultati: <i>Študent/študentka razvije:</i>	Intended learning outcomes: <i>Students develop:</i>
<ul style="list-style-type: none"> • sposobnost odkrivanja praktičnih problemov s področja upravljanja z okoljem, ki jih je mogoče reševati z raziskovalnimi metodami in instrumenti, • zmožnost zastaviti, oblikovati in izvajati obsežen raziskovalni proces na področju upravljanja z okoljem, • zmožnost javnega predstavljanja in zagovarjanja pridobljenih raziskovalnih rezultatov, • sposobnost integracije teoretskih spoznanj, raziskovalno-metodološkega znanja in praktičnih izkušenj, • usposobljenost za raziskovanje. 	<ul style="list-style-type: none"> • the ability to identify practical environmental management problems, which can be addressed using research methods and instruments, • the ability to plan, develop and carry out a comprehensive research process in the field of environmental management, • the ability to publicly present and defend the research results obtained, • the ability to integrate theoretical knowledge, research and methodological knowledge with practical experience, • the competences to carry out research.
Metode poučevanja in učenja:	Learning and teaching methods:
<ul style="list-style-type: none"> • <i>predavanja z aktivno udeležbo študentov – razлага, diskusija,</i> 	<ul style="list-style-type: none"> • <i>lectures with active student participation – explanation, discussion, questions, examples, problem solving,</i>

<p>vprašanja, primeri, reševanje problemov,</p> <ul style="list-style-type: none"> • <i>seminarske vaje</i> z aktivno udeležbo študentov – študentje bodo na konkretnih problemih ponovili in utrdili pojme in metode, spoznane na predavanjih, • <i>kolokviji</i> – z njimi bodo študentje stimulirani, da sproti študirajo obravnavano snov. 	<ul style="list-style-type: none"> • <i>tutorials</i> with active student participation - students practice and review concepts and methods covered in lectures, • <i>midterm examinations</i> – will encourage students to study the material covered in lectures.
--	---

Načini ocenjevanja:	Delež (v %) Weight (in %)	Assessment:
<p>Načini:</p> <ul style="list-style-type: none"> • izpit: študent lahko opravi izpit tudi, če ima oba kolokvija pozitivno ocenjena • raziskovalna naloga: izdelava, predstavitev in zagovor <p>Ocenjevalna lestvica: ECTS.</p>	<p>60 %</p> <p>40 %</p>	<p>Types:</p> <ul style="list-style-type: none"> • examination: students can also pass the exam if both colloquia are positive • research paper: preparation, presentation and defence. <p>Grading scheme: ECTS.</p>
